Allerio™

Enabling Lifesaving Communications

Portable - Connected - Reliable

ALLERIO ADVANCED MOBILE TECHNOLOGY HUB provides extended mobile broadband connectivity from the field leveraging 3 major LTE networks.

- ▶ **Temporary Hospitals** - For physicians, nurses and other healthcare workers providing care in re-purposed buildings or tents.
- ▶ **Drive Through Testing Centers** - For patients with physician authorization to obtain COVID-19 testing.
- ▶ **Temporary Mobile Staging Areas** - For symptomatic patients sent to this area near a hospital for triage nurse assessment.
- ▶ **Emergency Medical Services (EMS) / First Responders** - For those responding to emergency calls, providing patient care and coordinating telemedicine visits in the field.
- ▶ **Physicians, PAs, NPs** - For those using the Allerio Mobile Hub and hospital workflow tools to work from anywhere and leverage telemedicine to minimize acute patient exposure.

Combining the Allerio Mobile Hub with hospital workflow platforms will fully enable remote transfer of patient data and telemedicine.

Reliable Telemedicine Platform

The Allerio Mobile Hub's connectivity complements hospital workflow platforms to deliver high quality two-way video for telemedicine delivery.

Connected Devices and Medical Equipment

The Allerio Mobile Hub can simultaneously transmit data from more than 7 different wireless devices on a fully encrypted basis to enable rapid patient assessment and reporting.

Field Ready

The Allerio Mobile Hub is rugged and deployable for field use environments. The Mobile Hub is capable of being cleaned and decontaminated. It has a six hour battery life and easy charging capabilities.

Allerio provides a portable, mobile, secure, and network-optimized connectivity solution running across three major LTE carriers.

REAL-TIME COMMUNICATION

Always-on, live access for medical providers in the field to send rich data in real time and to have two-way telemedicine capabilities.

EASY TO DEPLOY

Fully managed platform-as-a-service including data costs, hardware maintenance, support, and technology upgrades. No equipment to buy...ever.

INCREASED EFFICIENCY

Anywhere, anytime patient care reporting and hospital communications for faster and more reliable communications in the field.
